MARREL ASSISTS YOU IN THE REALIZATION OF YOUR PROJECTS

Marrel is the inventor of the Ampliroll® hooklift

As designer, manufacturer and assembler of the system, the company has total control of the entire production process and offers a wide range of hydraulic hoists.

Combining intelligent design with high pressure hydraulics, Marrel's product range is thoroughly adapted to the requirements of professional users for efficiency and productivity.

The clever design and quality materials used in the production of Marrel Ampliroll hoists guarantee high performance and durability.

The product range, consisting of three lines of Ampliroll hooklift, allows containers of various lengths to be loaded from the ground onto a trailer, transported and tipped.

For a wider range of handling possibilities and optimum performance, the design office is able to tailor the equipment to meet specific customer requirements.

Versatility, power, reduced maintenance costs and standards compliance are the major advantages provided by Marrel Amplirolls.

Innovation at the service of performance to meet your requirements for various applications.

The new Ampliroll® hooklift offers our customers the best-in-class performance

Strength

- Advanced tilting frame acting as a power multiplier providing an unmatched breakout force
- The bodies are lifted even if they are bogged down, the force at the hook is greater than the suction effect
- The Ampliroll® hooklift manages overloads and also unevenly distributed payload

Productivity

- Faster deployment speed for optimized cycle times
- Reduced own weight for increased payload

Versatility

- A higher number of equipment lengths for optimized and customized solutions
- A wide range of fully bolt-on accessories for homogeneous installations
- Low and uniform equipment height

Quality

- Robust design, easy to use and to maintain
- All products are blasted to provide better anti-corrosion resistance
- Marrel plants are certified ISO 9001
- After the design, the products are tested over 24000 cycles in the Marrel research center to receive the Marrel label of quality and reliability.

Key points

- Rear hydraulic body locking
- Automatic mechanical lock to secure main arm and tilting frame in tipping mode
- Pneumatic controls in cab
- Pin mounted hook, easy to replace
- Pre-drilled subframe
- Free tilting frame that acts as a power multiplier
- Integrated dashpot in main cylinders for end of stroke damping

Key points

- Innovative concept with tilting frame that is locked on the sub-frame in loading phase
- Rear hydraulic body locking
- Fast speed valve integrated as standard
- Integrated dashpot in main cylinders for end of stroke damping
- Pin mounted hook, easy to replace
- Pre-drilled subframe
- Pneumatic controls in cab
- Lifting capacity of 26T from ground level
- Designed for harsh work

Indicated figures in this document are for information only and can be changed without any prior notice.

Key points

- Optimize and reduce the loading angle
- Rear hydraulic body locking
- Locked tilting frame in loading configuration
- Loading below ground level and real lifting capacity
- Solid steel hook (without safety latch)
- Clear view to engage the hook to the body
- Perfect ratio weight / power
- Pre-drilled subframe

AMPLIROLL ALBA20 PA

Truck GVW 26T		A50	A53	A56
Container length : min. max.	LG mm	4500 6200	4800 6600	5100 6900
Max body for fixed underrun bar		5400	5700	6000
Lifting capacity	T	20	20	20
Tipping angle	°	47	47	50
Dist. hook to rear rollers	L1 mm	4950	5250	5550
Telescopic Jib stroke	L2 mm	650	650	650
Installation height	H mm	280	280	280
Equipment net weight	Kg	2520	2570	2670
Operating pressure	MPa	22	30	32

Indicated figures in this document are for information only and can be changed without any prior notice.

Key points

- Tilting hook arm that optimizes the loading angle and can handle more bodies
- Rear hydraulic body locking
- Locked tilting frame in loading configuration
- Loading below ground level and real lifting capacity
- Solid steel hook (with pneumatic safety latch)
- Perfect ratio weight / power
- Pre-drilled subframe

AMPLIROLL ALBA20 PA

with rear elevator

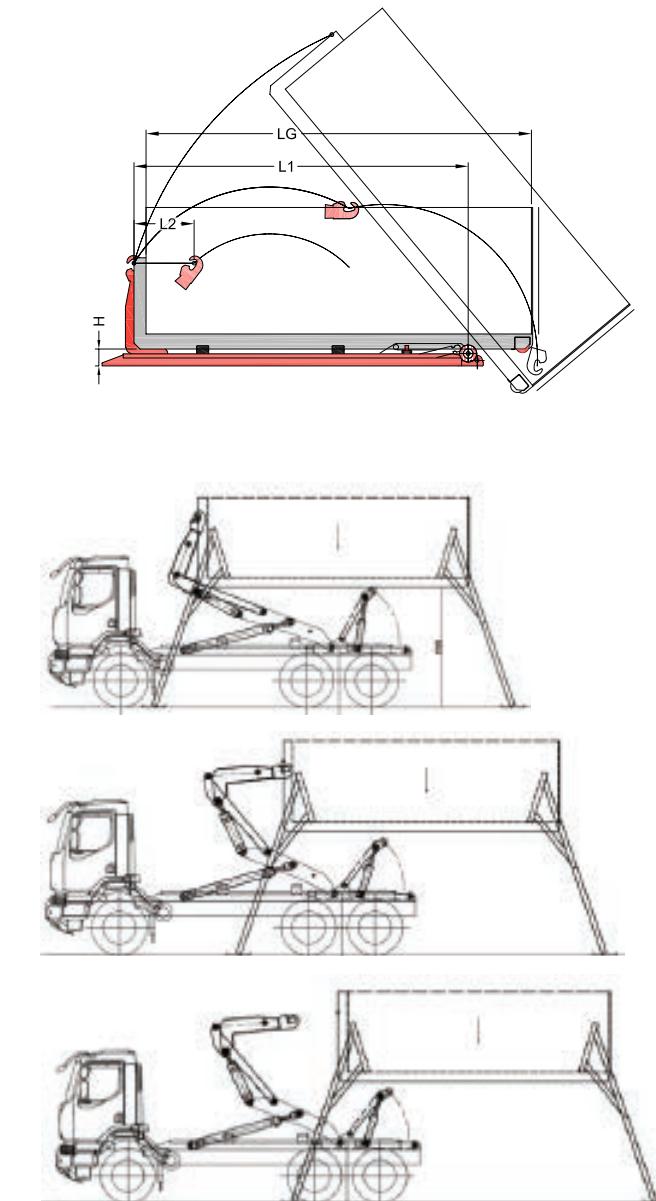

Truck GVW 26T			A50	A53	A56

Indicated figures in this document are for information only and can be changed without any prior notice.

Key points

- Rear elevator to position body on 4 telescopic supports (special for agriculture fertilizer spreading)
- Mobile controls suited for outside operation
- Simple body transfer onto trailer
- Solid steel hook (with pneumatic safety latch)
- Clear view to engage / disengage the hook to the body (even in elevated position)
- Perfect ratio weight / power
- Pre-drilled subframe

SKIPLOADER MB14

	Fixed	Telescopic	Fixed + upper cross	Tel + upper cross
Technical specifications	MB 14F	MB 14T	MB 14 FES	MB 14 TES
Lifting capacity : Body taken from ground level				
Depending of radius	2880 mm	14000 Kg	14000 Kg	14000 Kg
	3100 mm	12700 Kg		12700 Kg
	3300 mm	11700 Kg		11700 Kg
	4330 mm		10000 Kg	
Lifting capacity : Below ground level - 0.8 m				
Depending of radius	2880 mm	10000 Kg	10000 Kg	10000 Kg
	3100 mm	8400 Kg		8400 Kg
	3300 mm	8000 Kg		8000 Kg
	4330 mm		7500 Kg	
Weight of the units (steel platform)	3000 Kg	3250 Kg	3050 Kg	3340 Kg
Body width: (adjustable wedging) Body length and width must be confirmed	1610 / 1850 mm			
Recommended pump : type	M1 60			
Operating pressure	300 bars			
Oiltank capacity	45 L			
Operating time: Oil flow of 72 l/min				
Loading and unloading main arms :	41 - 30 sec	41 - 30 sec	41 - 30 sec	41 - 30 sec
Extension – retraction telescope :		8-4 sec		8-4 sec
Extension – retraction rear stabilizers :	5-4 sec	5-4 sec	5-4 sec	5-4 sec

Indicated figures in this document are for information only and can be changed without any prior notice.

Key points

- Different kind of bodies can be loaded
- Long main arms and increased telescope stroke
- Body-platform modular concept suited to large truck configuration
- No crossmember for taking stackable boxes
- Rear tipping hook with automatic safety latch
- Rear stabilizer with independant controls
- Pneumatic control (or radio remote control in option)

INNOVATING FOR ENHANCED PERFORMANCE

Marrel's spare part service is designed to provide a fast and effective response.

Any order for parts in stock placed before 16:00 can be shipped the same day from our central spare parts service.

In addition, because you can expect long service life from Marrel products, we do our best endeavours to supply spare parts for equipments which can be more than 20-year old.

The list of spare parts, indicating pricing and availability, is available on the Marrel website and can be accessed via the service points, distributors or dealers links.

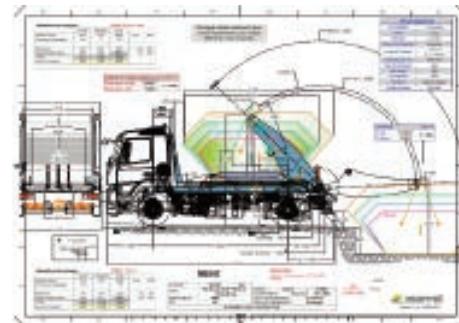

Marrel wants to assist its dealers and customers, therefore the design department has developed a software which meets the specific and dedicated needs of each of them. This technical pre-study software was developed by Marrel for all types of chassis whether using Ampliroll® hooklift, Skiploaders, load handling cranes, foldable and non-foldable cranes, flatbeds, etc.

This technical pre-study software takes into account the customers' needs and brings together all data in order to create an exhaustive pre-study drawing which presents our optimised and dedicated solutions.

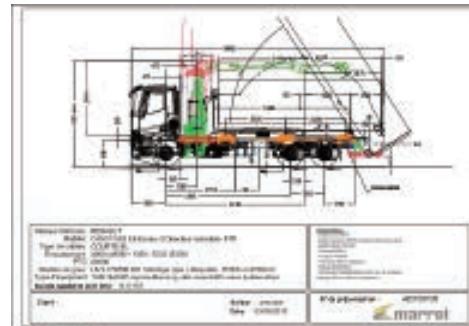

Thus, with this pre-study, a customer will be informed of the position of the hook at the rear for engaging it to the lifting ring, the setting of final operating pressure, and this with consideration of several specifications of the truck like position of the exhaust pipe, height of the truck frame, special truck or road regulation for the maximal axle weights ...

This technical recommendation software ensures that our customers receive solutions which are technically reliable.

Ampliroll® Hooklift technical pre-study

MARREL' TECH

COMMISSIONING OF EQUIPMENT

To effectively respond to legislation and constantly evolving technology, we give advice that will be refreshed in real time.

Our organization, oriented on quality services, leads us to provide our distribution network adequate and accessible data that is directly applicable..

Complementary to high comprehensive documentation, Marrel has developed a number of useful tools: stability calculation, Info Tech, bulletins for products Information, recommended pre -studies ...

Marrel ' Tech is a service dedicated to the Marrel distribution network; we do to provide the best support to our customers and partners.

Innovation at the service of performance

The software for commissioning of equipment is a service dedicated to the distribution network. It allows editing warranty certificate for installed Marrel equipment, with the purpose to provide the best support to our customers and partners.

Thus, customers will be able to know the date when the equipment was put into service, and the duration of its warranty period. It also ensures traceability of parts composing the equipment.
